

Machine Stretch Film / Pre Stretch Film

Machine Stretch Film

Stock Ref	Thickness in microns	Size
LSF50017	17	500mm x 1910m
LSF50020	20	500mm x 1620m
LSF50023	23	500mm x 1410m

- Available in standard or Power-Pre
- Standard film can be stretched to 150%
- Power-Pre film can be stretched to 220%

Both films come with anti-uv treatment to resolve problems which arise to loads stored in open air.

Pre-Stretch Film

EX-CELL Pre-stretch is a revolutionary new film or pallet wrapping designed to replace existing hand wrapping systems totally and provide users of conventional pallet wrapping machines with all the advantages afforded by power pre-stretch systems.

EXCEPTIONAL PERFORMANCE

- High quality resins for increased puncture, abrasive and holding strength
- Load stability
- High clarity

EASE

- Lightweight rolls
- Minimal necking means less revolutions
- Less energy to wrap a load

ERGONOMICAL

- Less Back Strain
- Less Film weight
- Less wrapping time

ENVIRONMENTAL - LESS FILM

- To landfill
- To recycle

Subject to legislation

ECONOMICAL

- Cost Savings
- Savings in time
- Less Waste

Hand Film
