

Protective Packaging

Corrugated Paper

- Lightweight general purpose packaging material
- Single faced corrugated liner

Stock Ref	Size
PCR0250	250mm x 75m
PCR0300	300mm x 75m
PCR0450	450mm x 75m
PCR0500	500mm x 75m
PCR0600	600mm x 75m
PCR0650	650mm x 75m
PCR0750	750mm x 75m
PCR0900	900mm x 75m
PCR1000	1000mm x 75m
PCR1200	1200mm x 75m
PCR1500	1500mm x 75m
PCR1800	1800mm x 75m

Loosefill Polystyrene

Optimal packaging protection

The correct choice of a packaging material depends upon its performance, economy and environmental compatibility. The reduction of labour and distribution costs, as well as the need for optimal protection of the goods to be dispatched, is essential. Equally important is the need to avoid unnecessary packaging by providing adequate protection whilst using the least possible material.

The goods being dispatched are completely enclosed in a protective cushion of high-quality, elastic material. When subjected to the shock loads of rough handling and distribution, ALTAess locks together, compressing to absorb the impact and instantly returning to its original shape. Even under repeated shock loads, ALTAess has proven superior to other packaging materials; thus providing long term protection to the goods being dispatched.

Biodegradable Voidfill

The naturally friendly packaging material –
Functional Advantages

- Light
- Clean
- Odour free
- Static free
- Free flowing
- Versatile

Ecological Advantages

- 100% biodegradable
- Made from annually renewable resources
- Compostable without residues
- Rapid organic recycling
- Water soluble, does not pollute groundwater

Economic Benefits

- Flowable
- Cost saving
- Disposable
- Reusable
- Available in bags and in bulk
- Distributed national

Code	Type	Size
PPB16	ALTAess	15 cubic foot
PPB19	Eco-Flo	15 cubic foot

- Bulk Systems and Hoppers available on request
